

Hemanth Mouli Cherupalli

Bangalore, Karnataka | hemanthmouli.ch@gmail.com |

LinkedIn: www.linkedin.com/in/hemanth-mouli-cherupalli-951580212/

Cybersecurity write-ups: <https://pirateinformatique.medium.com/>

Profile :

Cybersecurity professional with experience in Email Security, Vulnerability Assessment and Penetration Testing (VAPT), and Web Application Security. Skilled in phishing analysis, email threat investigations, vulnerability assessment, security reporting, and remediation support. Certified in GRCP, ISC2 Certified in Cybersecurity (CC), eJPT, and CLLMSP, with a strong foundation in cybersecurity, governance, risk, and offensive security.

Education :

Bachelor of Technology (B.Tech) in Cybersecurity

Malla Reddy Institute of Technology and Science (MRITS), Hyderabad | **2020 – 2024**

Affiliated to Jawaharlal Nehru Technological University Hyderabad (JNTUH)

Professional Experience :

Junior Data Service Engineer (Email Security Analyst) ARCCAA Analytics and IT Solutions LLP (Payroll) | Client: Centific | Nov 2025 – Present

- Analyzed and investigated phishing, spam, malware, and business email compromise (BEC) attempts.
- Identified and supported the blocking of malicious phishing URLs and domains.
- Monitored and reviewed suspicious email activities to support security investigations.
- Documented findings and contributed to security reporting and remediation efforts.
- Collaborated with teams to improve email security operations and reduce security risks.

Internships : Cybersecurity

Analyst

Tata Consultancy Services (Forage) | Apr 2025

- Conducted IAM risk assessments, implementing RBAC/MFA to reduce access vulnerabilities by 30%.
- Authored security reports and presented findings to stakeholders.

Cybersecurity Intern

Pinnacle Labs | Feb 2025 – Mar 2025

- Developed security tools including password analyzer and text analysis utility.
- Worked on security automation scripts for vulnerability assessment tasks.
- Gained hands-on experience in cybersecurity labs and testing environments.
- Improved understanding of offensive and defensive security concepts through practical exercises.

Cybersecurity Intern

Yhills + Skolar | Remote | Nov 2023 – Apr 2024

- Performed web application penetration testing exercises in lab environments.
- Identified and analyzed security vulnerabilities in controlled training scenarios.
- Strengthened understanding of VAPT methodologies and ethical hacking concepts.
- Gained hands-on experience in security testing and vulnerability identification

Cybersecurity Research & Blogs - The Clueless Tech Path Medium | Present

- Documenting my continuous learning journey across technology, cybersecurity, and system troubleshooting.
- Gaining hands-on experience through labs, real-world problem-solving, and technical experimentation.
- Exploring cybersecurity concepts, vulnerability analysis, and ethical hacking through practical learning.
- Building technical skills through self-learning, trial-and-error, and structured practice environments.
- Sharing insights and learnings to track growth and improve understanding of security and systems.

Technical Skills:

Vulnerability Assessment & Penetration Testing (VAPT)

- Web Application Security: OWASP Top 10, API Security, SQL Injection (SQLi), Cross-Site Scripting (XSS), CSRF, SSRF, and Business Logic Flaws.
- Vulnerability Assessment & Pentesting: Network & System VAPT, External Perimeter Testing, Port Scanning, Vulnerability Scanning, CVE Research.
- Exploitation & Privilege Escalation: Linux/Windows Privilege Escalation, Exploit Customization, Hands-on Lab Environment Testing.

Tools & Automation:

- Security Automation & Scripting: Python (security scripts, password analyzer), Bash
- Troubleshooting: Windows/Linux environments
- Research & Reporting: Security reporting, Vulnerability documentation, Remediation guidance

Certifications :

-
- GRCP – Governance, Risk & Compliance Professional
 - ISC2 Certified in Cybersecurity (CC)
 - eJPT – Junior Penetration Tester
 - CLLMSP – Certified Large Language Model Security Professional

Projects :

- Web Application Security Testing Labs : Performed vulnerability analysis and testing on vulnerable web applications, focusing on OWASP Top 10 vulnerabilities and exploitation scenarios.
- Vulnerability Assessment Reports : Created structured reports documenting security findings, risk levels, and remediation recommendations based on lab-based VAPT exercises.
- CTF & Hack The Box Practice : Solved real-world security challenges involving reconnaissance, exploitation, and privilege escalation in controlled environments.
- TryHackMe Learning Path (VAPT Track) : Completed hands-on labs covering web application security, system exploitation, and vulnerability assessment concepts.
- VulnHub Practice Machines : Performed penetration testing exercises including vulnerability identification, exploitation, and post-exploitation analysis.

Achievements

- Reported a security vulnerability in Dropbox via HackerOne, which was validated and classified as P5 (Informational severity) after triage review.
- Gained hands-on experience in responsible disclosure, vulnerability reporting, and security triage process through bug bounty participation.
- Demonstrated practical understanding of authentication-related security weaknesses during early-stage bug bounty research
